Ryu Sakamura

rsakamur@asu.edu | (602) 796-9412 | linkedin.com/in/ryu-sakamura/

PROFESSIONAL SUMMARY

GIS professional with 2+ years of experience managing geospatial datasets and producing maps and dashboards with ArcGIS Pro and ArcGIS Online. Proficient in Python and SQL for data queries and workflow automation, and skilled in CAD-to-GIS data conversion. Seeking to apply geospatial analysis to planning and engineering projects.

EDUCATION

Master of Arts, Geography May 2026
Arizona State University (ASU), Tempe, Arizona, USA
CGPA: 4.0/4.0 (Distinction)

Bachelor of Liberal Arts and Sciences Mar 2024
Aoyama Gakuin University, Sagamihara, Kanagawa, Japan
CGPA: 3.6/4.0

SKILLS

Geospatial Platforms: ArcGIS Pro (+ ModelBuilder, Network Analyst), ArcGIS Online, ArcGIS Enterprise, QGIS
ArcGIS Apps: Dashboards, Experience Builder, StoryMaps, Survey123 (+ Connect), Field Maps
Programming: Python (ArcPy, GeoPandas, Pandas), SQL (PostgreSQL, PostGIS), R (tidyverse, Shiny), Arcade
Design & Drafting: AutoCAD
Microsoft 365: Word, PowerPoint, Outlook, Excel (Advanced Formulas, PivotTable, Power Query)

PROFESSIONAL EXPERIENCE

Research Assistant, ASU School of Geographical Sciences and Urban Planning Oct 2026 – Present

- Conduct literature reviews for a research project funded by the Arizona Department of Transportation (ADOT) to develop a practical GIS framework for the agency's environmental planning.

GIS Intern, Arizona Department of Emergency and Military Affairs (DEMA) May – Aug 2025

- Designed ArcGIS Survey123 forms and collected damage data on 100+ wildfire-affected parcels.
- Performed network analysis in ArcGIS Pro to determine the shortest evacuation routes to shelters.
- Built an interactive dashboard in ArcGIS Experience Builder to track mass casualty incident victims in Arizona and identify potential matches with missing family members.
- Created a population impact map of evacuation zones for the Palo Verde Nuclear Generating Station in Arizona, supporting disaster planning for a region with more than 10,000 residents at risk.

Intern, Asia Air Survey Co., Ltd. Jun – Sep 2022

- Edited and converted AutoCAD building drawings into shapefiles, integrating them into ArcGIS Pro.
- Prepared and cleaned data in ArcGIS Pro, including georeferencing images, performing coordinate geometry (COGO), and correcting topology errors, contributing to the accuracy of data products for infrastructure planning, such as earthquake hazard maps for over five major cities in Japan.

PROJECTS

Optimizing Cooling Center Locations and Scheduling for Individuals Experiencing Homelessness in Maricopa County, Arizona Jan 2025 – Apr 2026
ASU School of Geographical Sciences and Urban Planning

- Used ArcPy and ModelBuilder to develop reproducible geospatial workflows applying geoprocessing tools (e.g., Buffer, Summarize Within) to evaluate walkability and service coverage for each facility.
- Developed spatio-temporal optimization models in CPLEX to identify optimal facility locations and operating hours, increasing service coverage by more than 1.5 times compared to the current system.
- Presented findings at the university's Urban Climate Research Center poster competition; awarded 3rd place among 30+ graduate students for the study's novelty and impact.

CERTIFICATES

Geographic Information Science, Arizona State University May 2026
Introduction to Statistics & Data Analysis in Public Health, Coursera Feb 2023
